**DETAILED ACTION**

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 13-32 are rejected under 35 U.S.C. 102(b) as being anticipated by Eberl (WO-99/42315).

Regarding claims 13-32, Eberl (whole document) discloses a device for determining at least one of a position and an orientation of an eye, in which a starting point or an end point of a light beam reflected by a part of the eye and detected by at least one of a detector system and a light beam projected by a projection system onto or into the eye quasi two- dimensionally describes a movement pattern of at least one of a scanning movement and a projection movement in the eye when a direction of the light beam is changed with respect to time according to the scanning movement or the projection movement, comprising a shifting device that causes a reference point of the movement pattern to follow into a pupillary or macula center, and a determination device that uses the movement pattern of the scanning movement or projection movement for determining the pupillary center or the macula center.
